

Digitise & Automate statement delivery on mobile

Cut complexity, reduce costs and save time by sending personalised statements straight to your customer's mobile phone.

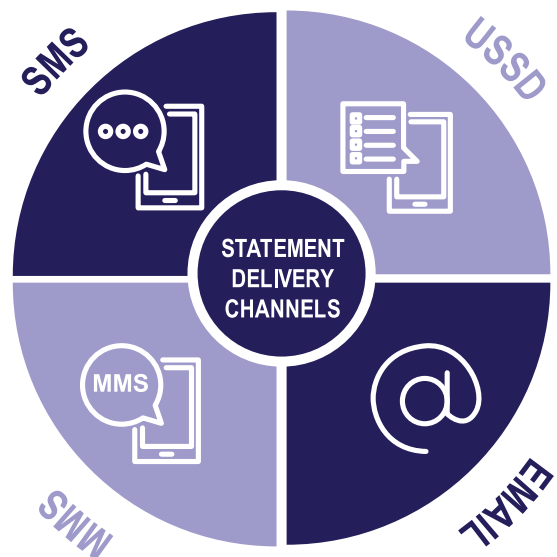

Grapevine provides secure and robust APIs through our digital communications platform (cPAAS) that enables businesses to automate their statements to customers on email, SMS, USSD and MMS. A mobile-friendly digital version of the statement is accessed through a unique link, with a trackable delivery record to ensure each customer has received to the correct statement information.

Benefits

- ✓ Reduce complexity, and save time and costs.
- ✓ Immediate delivery on channel of choice.
- ✓ Track delivery, clicks and statements viewed/read.

Why use Grapevine's cPAAS?

- * No app or software needed to view statement - supported on all mobile phones.
- * Trusted expertise, experienced technical resources and a well-defined integration process.
- * Robust cPAAS infrastructure with Tier-1 SMS Aggregator credentials.
- * In-depth reporting.
